

## **MFP Demonstration Services – Provider Billing**

MFP

All providers of MFP demonstration services must be enrolled Medicaid providers. This is done via the DPHHS website under “Montana Medicaid Provider Information” at the following link: <http://medicaidprovider.hhs.mt.gov/index.shtml>. Click on the tab called “New or Existing Provider Enrollment”.

Billing will occur through the MMIS system for all demonstration services – even for DD providers. *(DD providers will bill for all waiver services through the AWACS system following current protocols).* At this time, providers will be added to MMIS system as they begin working with MFP participants. Billing cannot occur until provider charge files have been updated to allow billing for the demonstration services. Providers will bill for services upon moving day.

All demonstration services will require prior authorization. The Regional Transition Coordinator will create the prior authorization and give it a pending status. The MFP State Transition Coordinator or the MFP Project Director will update the prior authorization to approve it.

All demonstration services must be supported by the MFP participant’s person-centered plan. This will be verified by the State Transition Coordinator.

All demonstration services will be paid at actual cost.
